* The Standards Council of Canada (SCC) voted to end its Laboratory Accreditation Program for Substance Abuse (LAPSA) effective May 12, 1998. Laboratories certified through that program were accredited to conduct forensic urine drug testing as required by U.S. Department of Transportation (DOT) regulations. As of that date, the certification of those accredited Canadian laboratories continued under DOT authority. The responsibility for conducting quarterly performance testing plus periodic on-site inspections

of those LAPSA-accredited laboratories was transferred to the U.S. HHS, with the HHS' NLCP contractor continuing to have an active role in the performance testing and laboratory inspection processes. Other Canadian laboratories wishing to be considered for the NLCP may apply directly to the NLCP contractor just as U.S. laboratories do.

Upon finding a Canadian laboratory to be qualified, HHS will recommend that DOT certify the laboratory as meeting the minimum standards of the current Mandatory Guidelines published in the **Federal Register**. After receiving DOT certification, the laboratory will be included in the monthly list of HHS-certified laboratories and participate in the NLCP certification maintenance program. DOT established this process in July 1996 (61 FR 37015) to allow foreign laboratories to participate in the DOT drug testing program.

(1) Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;

(2) Evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;

(3) Enhance the quality, utility, and clarity of the information to be collected; and

(4) Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submission of responses.

Background

E.O. 14161, "Protecting the United States from Foreign Terrorists and Other National Security and Public Safety Threats," directs implementation of uniform vetting standards and necessitates the collection of all information necessary for a rigorous vetting and screening of all grounds of inadmissibility or bases for the denial of immigration-related benefits. *See* 90 FR 8451 (Jan. 20, 2025). Execution of the E.O. requires U.S. Citizenship and Immigration Services (USCIS) to collect standard data on immigration forms and/or information collection systems. This data will be collected from certain populations of individuals on applications for immigration-related benefits and is necessary for the enhanced identity verification, vetting, and national security screening and inspection conducted by USCIS and required under the E.O.

This collection of information is necessary to comply with section 2 of the E.O. to establish screening and vetting standards and procedures to enable USCIS to assess an alien's eligibility to receive an immigration-related benefit from USCIS. This data collection is also used to validate an applicant's identity and to help determine whether such grant of a benefit poses a security or public-safety threat to the United States.

USCIS will collect biographic information on immigration information

collection instruments and systems. USCIS will update its forms and systems to collect additional information from individuals who seek admissibility or other benefits when that information is not already collected.

New Information To Be Collected

U.S. Government departments and agencies involved in screening and vetting, to include USCIS, identified 24 data elements that would constitute a new baseline threshold of data to be collected for identity verification and national security vetting. For USCIS, these data elements will be added to certain immigration benefit request forms where the information is not already collected. The 24 core data elements are as follows:

The following seven (7) data elements are biographic identifiers used to help USCIS confirm both an individual's identity as it relates to the submitted application and to other records. These biographic identifiers are also used by USCIS and screening partners to help confirm or disprove an association between an applicant and information of interest and the strength of that association in the context of the underlying information.

1. Name
2. Alias(es)
3. Sex
4. Date of Birth
5. City/State/Province and Country of Birth
6. Country/Countries of Citizenship
7. Country of Residence

The following data elements are a unique numeric identifier issued to a single individual that USCIS uses to help confirm both a person's identity and for DHS records. They are also used by USCIS and screening partners to help find, confirm, or disprove an association between an applicant, the strength of that association, or to provide other information about the individual that may be important in the adjudication.

Applicants will be asked to provide current passport/travel/national identity document information, country of issuance, issue date, and expiration date, as applicable. Other USCIS forms request more information on passports or travel documents to include expired documents and passports containing a U.S. visa. The questions related to passport information are requested depending on benefit eligibility and national security needs. If additional information is needed for this data element, USCIS will revise the applicable OMB approved information collection under the form's control number and not add the additional questions using this generic approval.

8. Passport/Travel Document or National ID
 1. Country of issuance
 2. Issue date
 3. Expiration date

The following 16 data elements are used by USCIS (1) to provide official correspondence to an applicant, and/or (2) as secondary data elements to help confirm a subject's identity as it relates to the submitted application and to other records, and/or (3) to, internally and with screening partners, help confirm or disprove an association between an applicant and information of interest, and the strength of that association in the context of the underlying information.

9. Telephone Number(s) used in the last five (5) years, including dates used
10. Email address(es) used in the last ten (10) years
11. U.S. Address: Residence or Destination, city, street
12. U.S. Address: Residence or Destination, state/province
13. Foreign Address city, street
14. Foreign Address state/province
15. U.S. Point of Contact Name, if applicant is located outside of the United States
16. U.S. Point of Contact Telephone Number, if applicant is located outside of the United States
17. U.S. Point of Contact Email, if applicant is located outside of the United States
18. Family Member Names (parent, spouse, siblings, and children)
19. Family Member Telephone Numbers (parent, spouse, siblings, and children) used from the last five (5) years
20. Family Member Date(s) of Birth
21. Family Member Place(s) of Birth
22. Family Member Residence(s)

Applicant information is collected to maintain a record of persons applying for specific immigration benefits, and to help determine whether these applicants are eligible to receive the benefits for which they are applying. The information provided through USCIS forms is also analyzed—along with other information that the Secretary of Homeland Security determines is necessary, including information about other persons included on the USCIS forms—against various security and law enforcement databases to identify those applicants who may pose a security or public-safety risk to the United States.
